About Forgepoint

Backing builders of the [/digital future/](#)

Forgepoint is an early-stage venture capital firm that partners with transformative cybersecurity and infrastructure software companies. With the largest sector-focused investment team, over \$1 billion in AUM, and an active portfolio of nearly 40 companies, the firm brings over 100 years of collective company-building expertise and an Advisory Council of nearly 100 industry leaders to support exceptional entrepreneurs. Founded in 2015 and headquartered in the San Francisco Bay Area, Forgepoint is proud to cultivate a diverse, global community dedicated to backing builders of the digital future.

Investment Framework

Security is a business enabler and */innovation imperative/* for growth

Investment Themes

Grounded in */customer priorities/* and */market drivers/*

Securing AI, AI for Security

How cybersecurity can secure AI and how AI can improve cybersecurity

Continuous Trust and Identity Verification

Creating fully secured digital identities and perfect data that connects in real time

Cybersecurity for the Long Tail

Protecting the underserved Small and Midsize Businesses (SMBs) that power the global economy

Proactive Cybersecurity and Risk Management

It's not whether a company will get breached – it's a matter of when, and what to do about it

Securing Infrastructure, from Cloud to Edge and Beyond

Establishing a robust digital grid to access business-critical resources to drive immediate outcomes

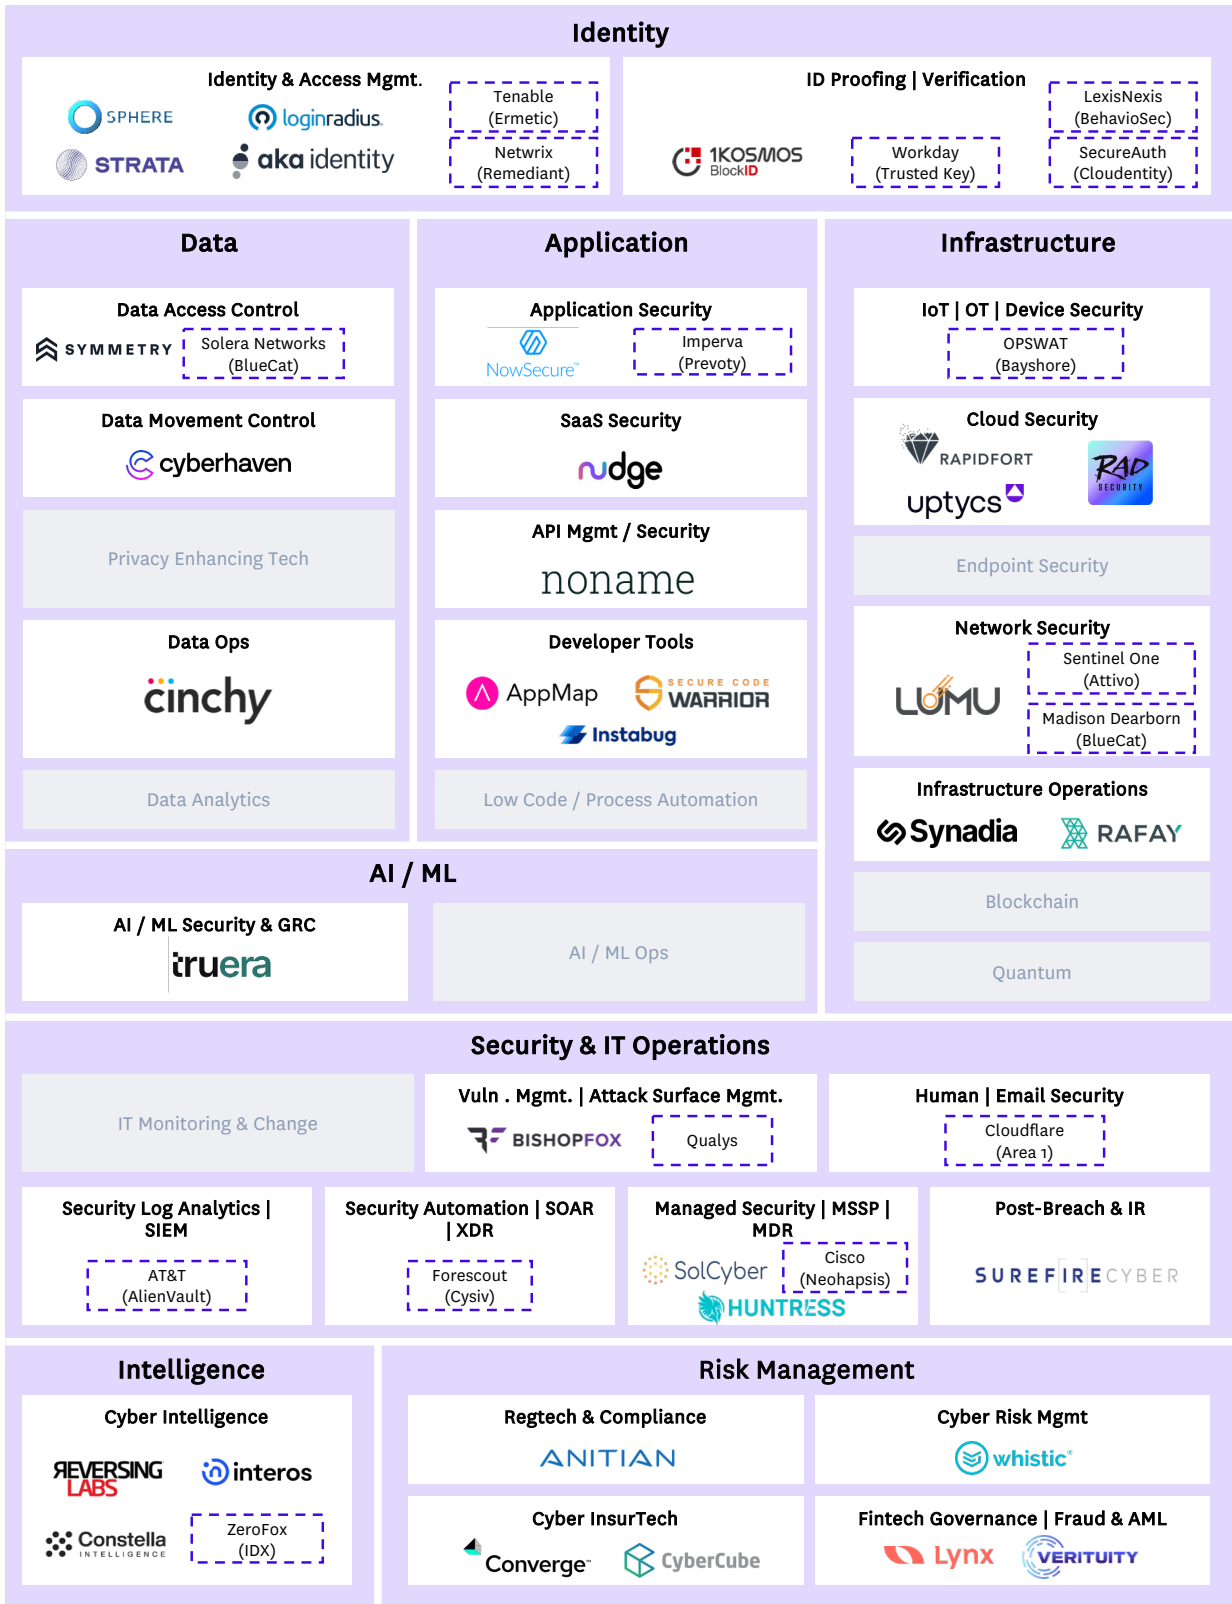

Trust in Software

The future of software is secure components flowing through a resilient supply chain

Forgepoint Portfolio

Most */extensive portfolio/* of active cybersecurity and infrastructure companies

1kosmos.com

Unifying identity verification and passwordless multi-factor authentication (MFA)

Founded in 2018, 1Kosmos enables remote identity verification and passwordless multi-factor authentication for workers, customers and residents to securely transact with digital services.

Sample Customers and Partners

Company Products

The 1Kosmos BlockID platform verifies user identity and creates a reusable digital wallet for high assurance authentication into digital services and instant validation of end-user qualifications, competencies, authority, and more. A unique privacy-by-design architecture centered around a private and permissioned blockchain eliminates centralized honeypots of end user personal identifiable information (PII), simplifying compliance to privacy mandates such as GDPR and providing organizations tamper evident verification to always know the identity behind devices accessing applications, data and services. BlockID has attained certification to NIST 800-63-3 and UKDIATF via Kantara, FIDO2 and iBeta DEA EPCS. It is delivered as a stand alone or embedded cloud service or via a managed service as a Credential Service Provider for residents.

Hemen Vimadalal

Prior to 1Kosmos, Hemen served as Founder & CEO of Simeio Solutions, Investor at Unicorn Ventures, and Founding Team Member of Vaau (acquired by Sun Microsystems).

 [linkedin.com/in/hemen-vimadalal-2561b02/](https://www.linkedin.com/in/hemen-vimadalal-2561b02/)

akaindentity.io

Data and intelligence layer simplifying identity access management (IAM)

Founded in 2023 in San Francisco, AKA Identity uses AI, data engineering, and data science to simplify manual and inefficient identity and access management (IAM) decisions with visibility, intelligence, and action.

Sample Customers and Partners

Fortune 500 enterprise organizations across Finance, Healthcare and High Tech.

Company Products

AKA Identity is the leader in identity resolution for the workforce. The AKA Identity Data Platform aggregates disparate data sources into an Identity Data Fabric to provide a comprehensive view of identities, accounts, and access privileges, and how they relate to an organization's overall security posture. By harnessing the power of advanced analytics and algorithms, the AKA Identity Data Platform turns data into actionable insights so customers can mitigate risk, identify inaccuracies, and make informed decisions.

Will Lin

Prior to AKA Identity, Will was a founding team member, Managing Director, and Venture Partner at Forgepoint where he served on 5 IAM Boards. He started his career in investment banking with Citi. He is a published author and co-creator of the Security Tinkerers community.

 <https://www.linkedin.com/in/tom-kelly-396363/>

Tom Kelly

Prior to Anitian, Tom served as CEO of IDX (ZFOX), AccelOps, Moxie Software, Epicor, BlueStar Solutions, and Blaze Software. He has served on the Boards of Converge, Anitian, Fabrinet (NYSE: FN), FEI Company.

 <https://www.linkedin.com/in/tom-kelly-396363/>

Company Products

Anitian’s pre-engineered and automated cloud application infrastructure platforms deploy in a single day to empower enterprises to go from application to cloud to production 80% faster and at 50% of the cost.

- Anitian SecureCloud platforms for Compliance Automation and Enterprise Cloud Security unify DevOps and security to deliver the fastest path to security and compliance in the cloud.
- Drive FedRAMP audit-readiness in 60 days at 50% of the cost.
- Secure applications from cloud to production 80% faster.

anitian.com

Compliance automation and cloud security

Founded in 1995, Anitian delivers the fastest path to security and compliance in the cloud. Its compliance automation platform helps SaaS companies get applications to market quickly and delivers a full suite of security controls – pre-engineered and pre-configured to rigorous security standards such as FedRAMP, PCI, CMMC, GDPR, or ISO27001.

Sample Customers and Partners

Elizabeth Lawler

Elizabeth is a serial entrepreneur. She was CEO and Co-Founder of Conjur (acq. CYBR). Co-founder of eClinicalDiary, Chief Data & Informatics Officer at Generation Health (acq. CVS), and held senior roles in research, data and compliance in healthcare.

 <https://www.linkedin.com/in/elizabethlawler/>

Company Products

Unlike legacy static code analysis systems, AppMap is dynamic, powering the streaming and integration of data from Continuous Integration and Development platforms (CI/CD), analysis of data flows, and identification of key functions and dependent services for any feature or functionality.

AppMap collects information about how code works and presents interactive, searchable diagrams that let users navigate and visualize exactly how functions, web services, data stores, security, I/O, and dependent services work together. AppMap works right in the code editor and links directly to code so developers can use the diagrams to make immediate code changes and improvements.

appmap.io

Runtime code analysis for developers

Founded in 2019, AppMap is an open source company that helps developers and their organizations keep their software aligned, clear and secure through software design observability and runtime code analysis.

Sample Customers and Partners

Over 70K software developers; AppMap libraries have been distributed to codebases in 160 countries, amassing 1M downloads and counting.

bishopfox.com

Offensive security through penetration testing and continuous attack surface management

Since 2005, Bishop Fox has provided software and security consulting services to the world's leading organizations to help secure their products, applications, networks, and clouds with penetration testing and security assessments.

Sample Customers and Partners

25% of the Fortune 100, half of the Fortune 10, eight of the top 10 global technology companies, and all the top global media companies

Company Products

Bishop Fox is the leading authority in offensive security, providing solutions ranging from continuous penetration testing, red teaming, and attack surface management to product, cloud, AI/ML and application security assessments. Its Cosmos platform, service innovation, and culture of excellence continue to gather accolades from industry award programs including Fast Company, Inc., SC Media, and others, and our offerings are consistently ranked as "world class" in customer experience surveys. They've been actively contributing to and supporting the security community for almost two decades and have published more than 16 open-source tools and 50 security advisories in the last five years.

Vincent Liu

Prior to Bishop Fox, Vincent served as Information Security Specialist at Honeywell, a Security Consultant at EY and a Security Analyst at the NSA. He is an Advisor to AppOmni, Elevate Security, Mod n Labs, and CLEAR (clearme.com).

[linkedin.com/in/vinnieliu/](https://www.linkedin.com/in/vinnieliu/)

cinchy.com

Making integration obsolete with a universal data network

Founded in 2017, Cinchy is the world's first dataware platform that liberates data from enterprise applications to create a universal, fully collaborative data network. Built for real-time data collaboration, dataware eliminates the need for costly and time-consuming integrations, and mitigates risks of data duplication.

Sample Customers and Partners

Company Products

Cinchy helps users and teams manage, share, use and gain insights from all data sources and formats, providing simplified, streamlined and authorized access to manage, control and collaborate on data. Its federated data network connects data across applications without point-to-point integration or copying data and automates consistent data controls in real-time, eliminating data fragmentation and silos while mitigating time-consuming maintenance and exposure to risk. With dataware, enterprise data is now available to whomever it's needed, able to move simply and freely to wherever it's needed. Dataware decreases IT project delivery risks, establishes guaranteed data access controls, and enables effortless collaboration on quality data across an organization's people and systems.

Paul Patterson

Prior to Cinchy, Paul served as CRO of Branch, Operating Partner and Resident CRO at Next47, the venture capital group for Siemens, and held senior executive roles at NetApp, DataVistor, Vidado (acq. by SS&C), GLMX, and Adobe.

<https://www.linkedin.com/in/paulpatterson/>

**Kevin
Senator**

Prior to Constella, Kevin was the CEO of aDolus Technology, CRO of Elevate Security, Special Advisor to the CEO of Forescout, President, CEO, and Board Member of Bayshore Networks (acq. by OPSWAT). He also held senior sales leadership roles at Call Amp, Blackphone, SS8 Networks, Cisco, Redhat and others.

 <https://www.linkedin.com/in/kevin-senator/>

Company Products

Our product portfolio delivers unmatched digital risk protection for your people, your brand, and your data. Our products combine automation, continuous monitoring, and scalability to deliver actionable intelligence to businesses of all sizes to stop digital threats before damage can occur.

- Protect Key Employees, executives and domains with continuous, automated monitoring
- Real-time Alerts enable you to quickly identify and block compromised credentials & initiate takedown
- Seamless Integration with your IT and security systems to accelerate onboarding and response times 10x.
- Global Reach that monitors thousands of data sources across social media, surface, deep & dark web with the most extensive data breach collection on the planet

Identity risk intelligence, powered by AI

Formed in 2020, Constella is a leader in digital risk protection, helping organizations anticipate, identify, and remediate targeted threats to their people, brands, and assets – at scale. Constella combines proprietary data, technology, and human expertise powered by the most extensive breach and social data collection on the planet, from the surface, deep and dark web.

Sample Customers and Partners

**Tom
Kang**

Prior to Converge, Tom served as Head of Cyber, Tech and Media at AGCS, Global Cyber Product Leader at Willis Towers Watson, Enterprise Lead for Cyber, Tech and Professional Liability at The Hartford, and AVP, Director of Claims and Services of the ACE Group.

 <https://www.linkedin.com/in/thomas-kang-1a142667/>

Company Products

Converge is a modern managing general agent (MGA) that fuses cyber insurance, security and technology to provide businesses with clear and confident cyber protection. By deploying a proprietary data ecosystem underpinned by expert underwriting, Converge provides risk solutions that deliver high-value strategies with improved outcomes. Converge's philosophy is that insurance needs the right elements and personalized approach to mitigate risk. By partnering with its policyholders, Converge precisely formulates their business needs so they can confidently become cyber secure.

Fusing cyber insurance, security and technology

Founded in 2021, Converge is creating risk management solutions that allow organizations to focus on what matters most – their businesses. The company converges its network of technology service partners, underwriting powered by unique data analytics, and proprietary insurance offerings to provide businesses with more holistic protection.

Sample Customers and Partners

cybcube.com

Quantifying cyber risk for the insurance industry

Founded in 2015 within Symantec, CyberCube now operates as a standalone company exclusively focused on the insurance industry. CyberCube helps insurance companies make better decisions when underwriting cyber risk and managing cyber risk aggregation.

Sample Customers and Partners

Company Products

CyberCube delivers the world's leading cyber risk analytics for the insurance industry. With best-in-class data access and advanced multi-disciplinary analytics, the company's cloud-based platform helps insurance organizations quantify cyber risk to facilitate placing insurance, underwriting cyber risk and managing cyber risk aggregation. CyberCube's enterprise intelligence layer provides insights on millions of companies globally and includes modeling on thousands of points of technology failure.

Pascal Millaire

Prior to CyberCube, Pascal served as a Board of Director at Capital Group, VP & General Manager of Cyber Insurance at Symantec, and President at Fingi. He was also an Engagement Manager focused on property and casualty insurance, reinsurance, insurance brokerage affairs and risk management with McKinsey & Co.

[linkedin.com/in/pascal-millaire-962001b/](https://www.linkedin.com/in/pascal-millaire-962001b/)

cyberhaven.com

Transforming data protection with data lineage and large-scale graph analytics

Cyberhaven has built the industry's first Data Detection and Response (DDR) platform to protect intellectual property and sensitive data from theft and mis-use by mapping the full journey of every piece of data to accurately classify sensitive data, detect risk, and proactively enforce policy.

Sample Customers and Partners

Company Products

Cyberhaven's Data Detection and Response (DDR) platform takes a fundamentally different approach to securing IP and sensitive data from mis-use and theft by mapping the full journey of data and using data lineage to accurately classify sensitive data, detect risk, and enforce policies. The DDR platform is built with Cyberhaven's Dynamic Data Tracing technology, which:

- Traces all data all the time by collecting logs and event data from user endpoints and SaaS applications
- Correlates these events across hosts and all applications to formulate clear and insightful data flows
- Applies large scale graph analytics to detect and respond to risk

Howard Ting

Prior to Cyberhaven, Howard was CMO of Redis Labs, CMO of Zscaler, and CMO of Nutanix. He also held product management and marketing roles at Palo Alto Networks, Cisco, Securent, Microsoft, Identity Engines, and RSA.

[linkedin.com/in/howardting/](https://www.linkedin.com/in/howardting/)

**Kyle
Hanslovan**

Prior to Huntress, Kyle served as Cyber Warfare Operator at the Air National Guard, Co-Founder & Partner at StrategicIO, and Senior Cyber Vulnerability Analyst at ManTech International Corporation.

 [linkedin.com/in/kylehanslovan/](https://www.linkedin.com/in/kylehanslovan/)

Company Products

Huntress is a leading provider of advanced breach detection and actionable cybersecurity intelligence for SMBs. It is the leading Managed Security Platform built for SMBs and backed by expert partnerships across IT providers, resellers, and mid-sized organizations. Huntress provides fully managed detection and response, 24/7 security operations monitoring, and best-in-class security awareness training. Huntress tracks down and evicts hackers hiding in plain sight, enables earlier detection of potential ransomware incidents, maximizes frontline protection with Microsoft Defender, and highlights external vulnerabilities to tighten perimeter defenses.

Managed detection and response for SMBs and the IT Providers that serve them

Founded in 2015 by former NSA cyber operators and backed by a team of threat ops researchers, Huntress enables its partners to protect their customers from persistent footholds, ransomware, and find and stop hidden threats that sneak past preventative security tools.

Sample Customers and Partners

Serves SMB market through 10K+ MSP, MSSP, and direct customers, with over 2M endpoints protected.

**Omar
Gabr**

Omar co-founded Instabug with Moataz Soliman, Instabug’s CTO, shortly after they began developing mobile applications and quickly realized that there was no easy way to monitor their application’s performance or user experience. Instabug was created to address those gaps.

 <https://www.linkedin.com/in/okgabr>

Company Products

Instabug is a leading mobile monitoring, crash and bug reporting solution for mobile teams. Founded in Egypt and headquartered in San Francisco, Instabug is the most intuitive mobile-first observability platform that can be utilized throughout the entire mobile app lifecycle, empowering developers to organizations to optimize user experience and overall performance. The company’s platform scales with any sized business, allowing developers and enterprises alike to seamlessly monitor, alert, prioritize and debug during critical phases of the application life cycle. Instabug empowers mobile teams of all sizes with a unified mobile observability platform that provides both overall performance insights and granular information on the issues experienced by their users.

Optimizing mobile application performance

Launched in 2016, Instabug provides best-in-class mobile application performance monitoring, (APM), including crash reporting, bug reporting, and a powerful infrastructure that supports over two billion devices.

Sample Customers and Partners

interos.ai

Automated resilience across physical and virtual supply chains

Founded in 2005, Interos is the first and only Business Relationship Intelligence platform designed to protect enterprise ecosystems from financial, operations, governance, geographic and cyber risk in every tier of enterprise supply chains, continuously.

Sample Customers and Partners

Some of the world’s largest financial, airline, and technology companies, including two top 10 US banks, two top 10 airlines, and a top 10 CPG company.

Company Products

Interos’s platform enables customers to instantly discover and visualize their supplier ecosystem, identify supplier concentration risk, conduct multi-facet filtering to enforce sanction controls, expose high risk outliers to proactively monitor black swan events, and offers risk breakouts to understand what drives risk scores for an individual company.

Jennifer Bisceglie

Prior to Interos, Jennifer served as CEO of Interos Solutions, CEO of Quantum Leaps, and Director of Manhattan Associates.

 linkedin.com/in/jennifer-bisceglie-3328b2/

loginradius.com

Improving identity security and customer journeys with no-code identity access management

Founded in 2012, LoginRadius offers a no-code/low-code cloud-based Customer Identity and Access Management (IAM) platform. Companies can securely manage customer identities, deliver a unified digital experience across web and mobile applications, and comply with all major privacy regulations such as GDPR and CCPA.

Sample Customers and Partners

Company Products

LoginRadius provides a SaaS customer an Identity and Access Management platform that centralizes customer identities and manages the lifecycle of customer data from registration, login, authorization, and password management. Customers include consumer brands and eCommerce, banking and insurance, health and pharmaceuticals, media, entertainment, and public sector.ties to tighten perimeter defenses.

Rakesh Soni

Prior to LoginRadius, Rakesh founded NyaConcepts and NyaWebs, and worked as a Project Manager in the energy sector.

 linkedin.com/in/rakeshsonii/

Ricardo Villadiego

Prior to LUMU, Ricardo was CEO and Founder of Easy Solutions, which he led to its acquisition by Cyxtera Technologies for \$2.8Bn in 2017. Prior to Cyxtera, he held leadership roles at IBM, Trend Micro, and Unisys, scaling each organization into key markets.

 <https://www.linkedin.com/in/rvilladiego/>

Company Products

Lumu’s Continuous Compromise Assessment™ model is made possible by its ability to collect, normalize and analyze a wide range of network metadata, including DNS, Netflows, Proxy and Firewall Access Logs and Spambox. The level of visibility that only these data sources provide, allows Lumu to understand the behavior of your enterprise network, which leads to conclusive evidence on unique compromise levels.

Illuminating network threats with real-time visibility and compromise detection

Lumu helps organizations illuminate threats and isolate confirmed instances of compromise. Its powerful closed-loop, self-learning solution helps security teams accelerate compromise detection, gain real-time visibility across their infrastructure, and close the breach detection gap from months to minutes.

Sample Customers and Partners

Dan Dica

Prior to Lynx, Dan Dica held global executive leadership positions at OneSpan, VASCO, and Ubisoft, and was the CEO at WhiteStone. He is an Advisory Board Member to Agnostic Intelligence, which provides AI-based software for Third Party Risk Management.

 <https://www.linkedin.com/in/dandica/>

Company Products

Lynx is a pioneer in artificial intelligence (AI) for fraud and financial crime prevention, developed 20 years ago by leading experts in academia and industry. For two decades, Lynx has leveraged its expertise in AI to deliver fraud prevention at unmatched levels of accuracy, speed and scalability to multinational financial institutions and payment providers around the globe. Through its Lynx Fraud Prevention and Lynx AML, Lynx provides a comprehensive AI-led solution set to preventing fraud and financial crime. Its first of its kind, proprietary ‘Daily Adaptive Model’ continually learns new behaviors and retains models daily, further enhancing the accuracy of its risk scores. Lynx currently protects over nearly 60 billion transactions and over 300 million consumers annually at 3x the industry performance standard with extremely low false-positives.

AI-powered financial crime and fraud prevention

Created over 20 years ago by AI experts at the Autonomous University in Madrid, Lynx provides advanced AI and ML software designed to prevent fraud and financial crimes.

Sample Customers and Partners

nonamesecurity.com

Proactive API security

Founded in 2020, Noname is the takes a complete, proactive approach to API Security. Noname covers the entire API security scope across three pillars — Posture Management, Runtime Security, and API Security Testing. Noname is headquartered in Silicon Valley, with offices in Tel Aviv and Amsterdam.

Sample Customers and Partners

Company Products

Noname Security protects APIs in real-time and detects vulnerabilities and misconfigurations before they are exploited. The Noname API security platform finds and inventories all APIs; detects attacks, suspicious behavior, and misconfigurations using AI-based behavioral analysis; prevents attacks and integrates with existing remediation and security infrastructure; and actively validates APIs before deployment.

Oz Golan

Prior to Noname, Oz served as the Director of R&D at NSO Group and as a Security Researcher in Unit 8200 (Israeli Defense Forces).

linkedin.com/in/ozgolan/?originalSubdomain=il

nowsecure.com

Mobile application security automation

Founded in 2009, NowSecure offers the industry's only full suite of mobile app security and privacy solutions spanning automated testing, software supply chain, pen testing and training.

Sample Customers and Partners

Company Products

As recognized experts in mobile security and privacy, NowSecure protects the global mobile app economy and safeguards the data of millions of mobile app users. Built on a foundation of standards, NowSecure empowers the world's most demanding organizations with security automation to release and monetize 30% faster, reduce testing and delivery costs by 30% and reduce AppSec risk by 40%. Only NowSecure offers a full solution suite of continuous security testing for DevSecOps, mobile app supply-chain monitoring, expert mobile pen testing as a Service (PTaaS), and training courseware. NowSecure actively contributes and supports the mobile security open-source community, standards and certification including OWASP MASVS, ADA MASA, and NIAP, and is recognized by IDC, Gartner, Deloitte Fast 500, and TAG Cyber.

Alan Snyder

Prior to NowSecure, Alan served as SVP of Corporate Development at Good Technology, CEO at BoxTone, Founder at Out-of-Sight Service, and CEO at Idea Integration.

linkedin.com/in/alansnyder/

Russell Spitler

Prior to Nudge, Russell served as VP of Products and Strategy at AT&T Cybersecurity, one of the world’s top five largest MSSPs. He also led products at AlienVault and Fortify Software. He is the Co-founder of the Open Threat Exchange, the world’s largest open threat intel community with over 200K participants.

 <https://www.linkedin.com/in/russell-spitler>

Company Products

Nudge Security helps modern organizations manage SaaS security at scale by working with employees, not against them. Its patented approach to SaaS discovery gives IT and security teams visibility of every SaaS and cloud asset ever created in an organization, and automated workflows to nudge employees toward more secure practices.

nudgesecurity.com

SaaS security discovery, monitoring and management

Founded in 2022, Nudge’s SaaS security management and identity governance eliminates shadow IT and SaaS sprawl while automating and orchestrating lifecycle management for all applications and identities.

Sample Customers and Partners

Brooke Motta

Brooke is a seasoned leader and executive with a proven track record in the computer and network security industry. Prior to RAD Security, Brooke was VP of Sales at Sonatype, CRO at Wallarm, CRO at Bugcrowd, and held senior roles at Rapid7 and Morgan Stanley.

 <https://www.linkedin.com/in/brooke-motta/>

Company Products

RAD Security’s behavioral, cloud-native detection and response platform creates behavioral footprints of good behavior across the software supply chain, infrastructure, workloads and identities to detect zero day attacks and sharpen inputs into shift-left and posture management.

rad.security

Eliminating cloud-native threats with behavioral detection and response

Founded in 2018, and formerly known as KSOC (Kubernetes Security Operations Center), RAD Security is a behavioral cloud native detection and response platform built to remediate software supply chain security risks in real time.

Sample Customers and Partners

rafay.co

Automating cloud and container management for platform teams

Founded in 2017, Rafay offers the industry's first Kubernetes Operations Platform to help enterprises maximize the value of containerized applications that deliver today's business innovation.

Sample Customers and Partners

Company Products

With Rafay, platform teams can operate modern application infrastructure at scale across public clouds, data centers, and the Edge. Rafay's Kubernetes Operations Platform provides a holistic approach that unifies the lifecycle management of both Kubernetes clusters and containerized applications. With Rafay, enterprises can use any Kubernetes distribution and immediately gain centralized automation, security, visibility, and governance capabilities for Kubernetes cluster and applications — in data centers, across public clouds such as AWS, Azure, and GCP and at remote/edge locations.

Haseeb Budhani

Prior to Rafay, Haseeb served as Vice President of Enterprise Strategy at Akamai, Chief Executive Officer & Co-Founder of Soha Systems (acquired by Akamai), and Chief Product Officer at Infineta Systems.

[linkedin.com/in/budhani/](https://www.linkedin.com/in/budhani/)

rapidfort.com

Software attack surface management

Founded in 2020, RapidFort is a cloud-native cybersecurity company that helps clients optimize and secure their cloud workloads automatically.

Sample Customers and Partners

Company Products

Modern cloud workloads include a large number of unused or seldom used components. Attackers frequently use these same components to help them “live off the land” and avoid detection once they have compromised a system or, in some cases, facilitate an initial compromise. RapidFort solves this problem by providing organizations with a platform to continuously monitor and minimize their software attack surface, reducing vulnerability remediation and patch management backlog by 80% on average.

Mehran Farimani

Prior to RapidFort, Mehran was Founder and CEO of Percipo, developer of ML, deep learning, computer vision and IoT solutions, and SVP of Engineering for the Fiery Division of digital imagery leader EFI.

<https://www.linkedin.com/in/farimani/>

Mario Vuskan

Prior to ReversingLabs, Mario held senior research positions at Bit9, Microsoft, and Groove Networks. He has authored numerous studies and speaks regularly at major security conferences like RSA and Blackhat.

 [linkedin.com/in/mariovuskan/](https://www.linkedin.com/in/mariovuskan/)

Company Products

ReversingLabs automatically analyzes binaries for sophisticated threats hidden across the network, endpoint and software packages to enrich analysis during event response and instill trust during software release. In only milliseconds, ReversingLabs analyzes complex binaries for the world's most sophisticated threats built to evade security controls. Its Titanium Platform integrates enterprise-wide supporting more than 4,000 file formats, speeds detection of malicious files through automated static and dynamic analysis, prioritizing the highest risks with actionable context. Services are delivered as cloud-based threat intelligence feeds for the SOC, a malware analysis workbench for threat hunters, and continuous software quality and verification assessments for application developers.

REVERSINGLABS

reversinglabs.com

Malware analysis, threat hunting, and software supply chain security

Founded in 2009, the ReversingLabs cloud platform is the leading provider of malware analysis, threat hunting and supply chain security for SOC and software development teams.

Sample Customers and Partners

Pieter Danhieux

Prior to Secure Code Warrior, Pieter served as Principal Instructor at the SANS Institute, Strategy & Innovation Lead at NVISIO, and Head of Delivery at BAE Systems Applied Intelligence.

 [linkedin.com/in/pieterdanhieux/](https://www.linkedin.com/in/pieterdanhieux/)

Company Products

Secure Code Warrior has developed the first gamified Developer Quality Assurance platform that helps individual software developers build their own secure coding skills while providing organizations and executives with the visibility and metrics to understand the secure code skill strengths and weaknesses of their development teams. Secure Code Warrior's platform supports 30 programming languages and frameworks and delivers over 3,500 training modules that cover more than 140 software weaknesses.

securecodewarrior.com

Agile learning platform for secure coding development

Founded in 2015, Secure Code Warrior provides an online secure coding platform that helps developers think and act with a security mindset every day.

Sample Customers and Partners

solcyber.com

Delivering curated and modern managed security protection

Founded in 2020, and incubated within Forgepoint, SolCyber is the first modern Managed Security Service Provider (MSSP) to deliver a curated stack of enterprise-strength security tools and services that are streamlined, accessible and affordable for any organization.

Sample Customers and Partners

Company Products

SolCyber has simplified managed security by taking away the enormous effort required to manage multiple vendor technologies, including the integration and ongoing support. SolCyber customers receive best-in-class protection that is faster, simpler and more cost effective to deploy, all in one priced per user license. It provides all customers with a foundational set of capabilities including:

- Advanced Email
- Managed Detection and Response (MDR)
- Ransomware assessment and training
- User Behavioral Analysis
- Managed SOC Services
- Customers can then extend this foundational service with additional services such as post breach response, cloud protection and application encryption.

Scott McCrady

Prior to SolCyber, Scott served as CRO of Ubiq Security, General Manager of SonicWall, and GM at FireEye.

sphereco.com

Pioneering identity hygiene and turnkey discovery, remediation, and sustainability

Founded in 2010, SPHERE is solving the age-old problem of permission sprawl with its unique Identity Hygiene solution. SPHERE is an award-winning, woman-owned cybersecurity business focusing on improving security and enhancing compliance.

Sample Customers and Partners

Company Products

SPHERE is the global leader in Identity Hygiene. The company is are dedicated to reshaping modern identity programs by embedding this foundational fabric, enabling organizations to quickly reduce risks. Its expertise lies in leveraging automation to deliver immediate time-to-value, providing an identity lens that protects an organization's accounts, data, and infrastructure.

Driven by core values of passion, empathy, and transparency, SPHERE is continually innovating and helping clients to sleep better knowing their attack surface is drastically reduced, thwarting the plans of bad actors every single day.

Rita Gurevich

Prior to Sphere, Rita served as Director of Messaging Product Management at StealthBits Technologies, Messaging at Barclays Capital, and Messaging AVP at Lehman Brothers.

linkedin.com/in/ritagurevich/

Eric Olden

Prior to Strata, Eric served as SVP & GM of Cloud Security and Identity Management at Oracle, CEO at Brite Content, Founding Partner at Launch Sciences, and Founder & CEO at Symplified.

[linkedin.com/in/boughtnotsold/](https://www.linkedin.com/in/boughtnotsold/)

Company Products

Strata's Identity Orchestration platform, Mavericks, is lightweight software that enables any application to be protected by any IDP or advanced identity service without costly refactoring. It does this through an abstraction layer that decouples identity from apps enabling them to modernize authentication and authorization without rewriting apps. Some popular customer

use cases include:

- Bridge identity and policy between clouds: scale architecture and secure apps with multi-cloud and multi-identity options — without refactoring.
- Modernize app IAM or IDPs: Switch clouds, swap IDPs or deploy the next big thing in identity, without touching the apps.
- Build IDP resiliency for secure, continuous access: Deploy an always-on solution that protects against identity outages even when internet connectivity is lost.

strata.io

Distributed identity orchestration for hybrid and multi-cloud environments

Founded in 2019, Strata invented Identity Orchestration to enable no-code distributed identity for hybrid and multi-cloud businesses. Its Mavericks Platform automates complex identity integrations by coordinating disparate identity systems to work together.

Sample Customers and Partners

Billy Gouveia

Prior to Surefire Cyber, Billy led the US business for global cyber and intelligence consultancy S-RM, co-founded data protection startup Jumbbit, and served as COO of Zanaris. He was an MD at Protiviti, a GM at Sungard, and a leader at Booz Allen's commercial risk management practice.

<https://www.linkedin.com/in/gouveia/>

Company Products

Surefire's delivery of digital forensics and incident response capabilities is built on a tech-enabled framework, delivered through a platform that aligns and connects each incident's breach coach, carrier, broker, and client.

- Pre-Incident: Surefire prepares clients to confidently manage incidents by assessing threats and exposures, improving plans, and strengthening response confidence through exercises.
- Incident Response: Surefire guides clients through ransomware, BEC, and other cyber incidents, bringing forward all the capabilities needed to manage through a response with confidence.
- Post-Incident: Surefire helps organizations emerge stronger post-incident, fortifying their security posture.

surefirecyber.com

Helping companies prepare for, respond to, and recover from cyber incidents with resilience

Founded in 2021, Surefire Cyber delivers swift, strong response to cyber incidents such as ransomware, email compromise, malware, data theft, and other threats with end-to-end response capabilities. Surefire Cyber provides clients confidence by helping them prepare, respond, and recover from cyber incidents—and to fortify their cyber resilience after an incident.

Sample Customers and Partners

symmetry-systems.com

Data and AI Security

Founded in 2018, Symmetry helps customers easily classify custom data types, reduce data blast radius and attack surfaces, detect ransomware attacks, enforce least-privilege access, and more. Powered by best-in-class AI, Symmetry provides organizations with the necessary toolkit to minimize data posture risks, demonstrate compliance, and react to threats and policy violations in real time.

Sample Customers and Partners

Company Products

Symmetry Systems is the Data+AI Security company, engineered specifically to address modern data security and privacy challenges at scale from the data out, providing organizations the ability to innovate with confidence. With total visibility into what data you have, where it lives, who can access it, and how it's being used, Symmetry safeguards organizational data from misuse, insider threats, and cybercriminals, as well as unintended exposure of sensitive IP and personal information through use of generative AI technologies.

Symmetry works with structured and unstructured data in all major clouds (AWS, GCP, Azure), SaaS storage services (e.g. OneDrive), and on-premise databases and data lakes. It is deployable in the most strictly regulated environments; as a read-only service, it inherits all security and compliance controls (e.g. FedRamp). That's why the most innovative and security conscious Fortune 50 financial service providers, manufacturers, pharmaceutical companies, and federal agencies rely on Symmetry to protect their crown jewel data.

Mohit Tiwari

Prior to Symmetry, Mohit served as a cybersecurity professor at UT Austin and a post-doctoral scholar in secure remote computation at UC Berkeley. Funded by DARPA and NSF, Tiwari has collaborated with teams at General Dynamics, Lockheed Martin, Intel, ARM and Google.

Will Uppington

Prior to TruEra, Will held several C-level roles in Product, Business Development, Strategy, and Customer Success at Bloomreach. Will also served as Director of Product Management at Clearwell Systems and Juniper Networks.

 <https://www.linkedin.com/in/wupington/>

Company Products

TruEra addresses the next big problem in AI - the quality problem. TruEra Diagnostics and TruEra Monitoring help companies ensure that their AI applications are effective, trustworthy, and fair across the full model lifecycle, from development through production. Not only does this help AI projects get out of the lab and into real world use, where they can start delivering on their promise, it also ensures that projects are fair, effective, and transparent, pleasing customers, stakeholders, and regulators. This visibility leads to higher quality, explainable models that achieve measurable business results, address unfair bias, and ensure governance and compliance.

truera.com

AI quality diagnostics and monitoring

Founded in 2019 and based on many years of academic research at Carnegie Mellon University, TruEra provides AI quality solutions to help enterprises analyze machine learning, improve model quality, and build trust. TruEra helps eliminate the black box surrounding widely used AI and ML technologies.

Sample Customers and Partners

Ganesh Pai

Prior to Uptycs, Ganesh served as Chief Architect of Carrier Products & Strategy at Akamai, Founder & VP of Systems Architecture at Verivue (acquired by Akamai), and Principal Architect at NetDevices (acquired by Alcatel-Lucent)

 [linkedin.com/in/ganesh-pai/](https://www.linkedin.com/in/ganesh-pai/)

Company Products

Uptycs is the leading cloud security platform for large hybrid cloud environments. Uptycs protect workloads wherever they run while extending security visibility from development to runtime. First-generation CNAPP solutions don't have the data needed to manage and prioritize risk. With Uptycs, data is power! Uptycs gives deeper context. Most CNAPPs can tell you if a vulnerable workload is exposed to the internet, but can they show vulnerable packages running now, or three weeks ago, and if and how an organization was breached? Uptycs can. Uptycs brings teams together to optimize security operations, ensure compliance, and accelerate remediation across cloud workloads, containers, Kubernetes, and software pipelines — all from a single security console, policy framework, and data lake.

uptycs.com

Unifying and scaling hybrid cloud security, from development to runtime

Founded in 2016, Uptycs provides the first unified, cloud-native security analytics platform that enables both endpoint and cloud security from a common solution.

Sample Customers and Partners

verituity.com

Transforming digital payouts for financial services

Founded in 2020, Verituity is a low-code full stack platform that provides the infrastructure for payouts and payments. The solution provides intra-process fraud detection across the payment process and protects against account takeovers.

Sample Customers and Partners

[BNY Mellon Launches New Payment Platform Vaia for Payee-Choice Disbursements](#)

[Verituity Joins Forces with Mastercard to Accelerate Secure Domestic and Cross-Border Payouts](#)

Company Products

Verituity’s verified digital payments platform enables first-time and on-time digital payouts. The platform incorporates identity verification, account validation, and payments orchestration to reduce payout risk.

Ben Turner

Prior to Verituity, Ben served as Chief Data & Strategy Officer of Interos, Co-Founder & CEO of MITA Group, and VP of VeriSign.

[linkedin.com/in/turnerb/](https://www.linkedin.com/in/turnerb/)

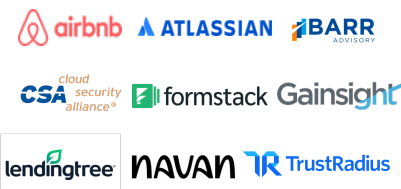

whistic.com

Building trust and assessing third-party risk with automated vendor assessments

Founded in 2015, Whistic is a provider of proactive vendor security and an innovator in changing the way that companies publish and evaluate security posture to build trust. Whistic is the single source of trust for buyers and sellers, helping companies speed up the pace of business.

Sample Customers and Partners

Company Products

The Whistic platform gives InfoSec teams the power to run world-class third-party risk management and customer trust programs with a unified, AI-powered experience that streamlines both sides of the vendor risk assessment process.

Whistic equips organizations with a Custom TPRM Program to significantly reduce the potential for costly data breaches while meeting regulatory compliance and audit requirements in a simple, automated process.

Whistic is uniquely designed to help Infosec teams reduce the time and resources spent on third-party risk management, de-risk the vendor ecosystem, and shorten procurement and sales cycles. Its Trust Catalog offers the industry’s most robust network where vendors and their customers can connect and seamlessly exchange on-demand security and compliance information, eliminating the need for a manual assessment.

Nick Sorensen

Prior to Whistic, Nick was Co-founder and COO of Prosper Healthcare Lending, COO of MyFinanceGuys, and held senior roles building and scaling startups.

Our Commitment to ESG

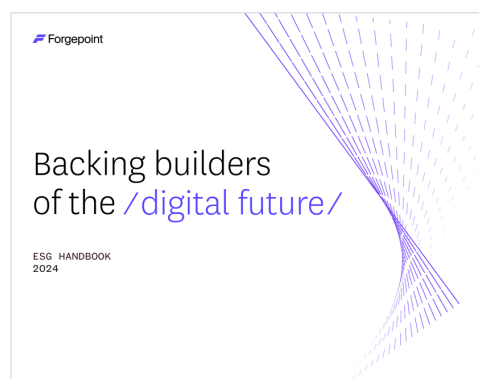

Driving /ESG initiatives/ across the portfolio

Forgepoint Capital’s mission is to protect the digital future. We believe investing in cybersecurity will protect individual privacy and ensure greater economic prosperity. In addition, responsible corporate behavior with respect to Environmental, Social and Governance (ESG) factors can mitigate risk and positively influence long-term financial performance.

We are keen to partner with organizations focused on ESG and are proud to be one of the founding signatories of [ILPA’s Diversity in Action](#) initiative and an active participant in [ILPA’s ESG Data Convergence Project](#). We are also a signatory of the [United Nations’ Principles for Responsible Investment \(PRI\)](#) group.

Our Responsible Investing Pledges

- **Inclusivity:** Foster a culture of meritocracy, fairness, and transparency.
- **Community:** Encourage all form and portfolio company professionals to engage in nonprofit giving and socially responsible volunteer activities.
- **Actions Over Words:** Proactively work with portfolio companies on environmental, health safety, and social initiatives to improve performance and minimize adverse impacts.
- **Governance:** Promote appropriate governance of our portfolio companies, including establishment of a qualified board of directors, engagement of independent auditors, and creation of appropriate channels for stakeholders to report potentially improper activities.
- **Compliance & Ethics:** Proactively comply with national, state and local regulations in the countries in which we invest, support competitive wages and benefits for employees, and provide a safe and healthy workplace for all.
- **Data Privacy & Security:** Protect the privacy of confidential consumer and corporate information through our own operations and those of Forgepoint portfolio companies.
- **Protecting Our Planet:** Ensure and continuously improve the environmental responsibility and energy efficiency of our firm and our portfolio companies.
