About Forgepoint

Backing builders of the [/digital future/](#)

Forgepoint is a leading venture capital firm that partners with transformative cybersecurity, artificial intelligence, and infrastructure software companies protecting the digital future. With the largest sector-focused investment team, over \$1 billion in assets under management, and an active portfolio of over 30 companies, the firm brings over 100 years of collective company-building expertise and its Global Advisory Council of 100 industry leaders to support exceptional entrepreneurs. Founded in 2015 and headquartered in the San Francisco Bay Area and London, Forgepoint is proud to cultivate a diverse, global community dedicated to backing builders of the digital future.

We are honored to collaborate with the extraordinary innovators featured in this catalog. For more information about Forgepoint and our family of companies, visit forgepointcap.com or follow Forgepoint on [LinkedIn](#) or [X](#).

Investment Framework

Security is a business enabler and */innovation imperative/* for growth

Investment Themes

Grounded in */customer priorities/* and */market drivers/*

Securing AI, AI for Security

How cybersecurity can secure AI and how AI can improve cybersecurity

Continuous Trust and Identity Verification

Creating fully secured digital identities and perfect data that connects in real time

Cybersecurity for the Long Tail

Protecting the underserved Small and Midsize Businesses (SMBs) that power the global economy

Proactive Cybersecurity and Risk Management

It's not whether a company will get breached – it's a matter of when, and what to do about it

Securing Infrastructure, from Cloud to Edge and Beyond

Establishing a robust digital grid to access business-critical resources to drive immediate outcomes

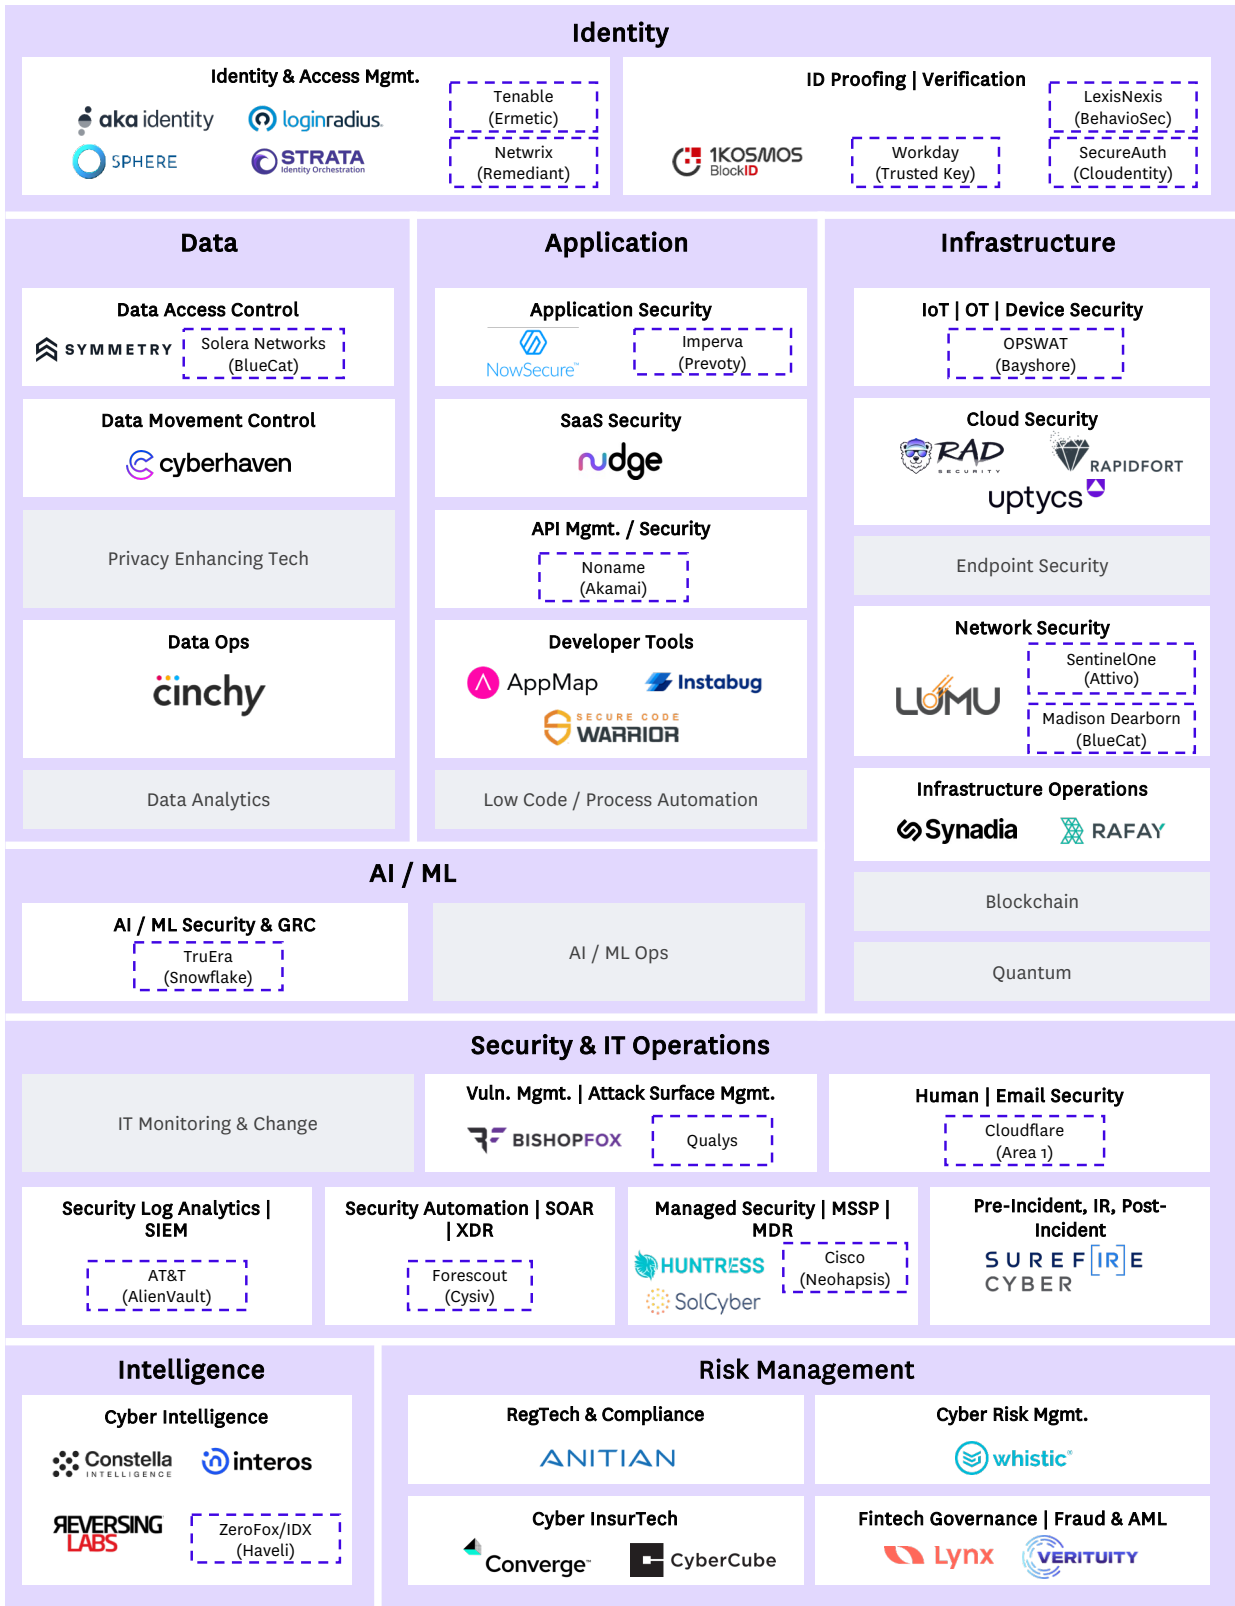

Trust in Software

The future of software is secure components flowing through a resilient supply chain

Forgepoint Portfolio

Acquired
(FPC Exits)

The most */extensive portfolio/* of active cybersecurity, AI, and infrastructure companies

Index by Company

Company	Sector(s)	Description	Page
 1KOSMOS	Identity	Unifying identity verification and passwordless multi-factor authentication	9

Recent M&A

Company	Transaction	Description
	Area 1 Security (acquired by Cloudflare (NYSE: NET))	Email security (business email compromise)
	Attivo Networks (acquired by SentinelOne (NYSE: S))	Deception-based identity threat detection and response (ITDR)
	BehavioSec (acquired by LexisNexis Risk Solutions/RELX)	Behavioral biometrics and continuous authentication to enhance trust and prevent fraud
	Cloudidentity (acquired by SecureAuth)	Identity-aware authorization and application security
	Concourse Labs (acquired by Fortinet)	Automated cloud governance to accelerate digital transformation
	Cysiv (acquired by Forescout)	Automated threat detection and response with SOC-as-a-service
	Ermetic (acquired by Tenable (NASDAQ: TENB))	Comprehensive cloud security across AWS, Azure and GCP environments
	ID Experts (acquired by Haveli)	Privacy and identity protection for consumers
	Noname (acquired by Akamai)	Proactive API Security
	Remediant (acquired by Netwrix)	Dynamic Privileged Access Management (PAM) for zero trust security
	TruEra (acquired by Snowflake)	AI quality diagnostics and monitoring

1kosmos.com

Unifying identity verification and passwordless multi-factor authentication (MFA)

Founded in 2018, 1Kosmos enables remote identity verification and passwordless multi-factor authentication for workers, customers and residents to securely transact with digital services.

Sample Customers and Partners

Company Products

1Kosmos verifies user identity and creates a reusable digital wallet for high-assurance multifactor authentication into digital services, preventing identity impersonation, account takeover and fraud while delivering a frictionless experience. Architected on a private and permissioned distributed ledger, 1Kosmos creates a decentralized identity giving users sole control over their data. This architecture also supports tamper-evident reusable verified credentials to instantly validate age, academic degrees, certifications, medical records, level of authority and more.

The 1Kosmos platform has attained certification to NIST 800-63-3 and UKDIATF via Kantara, FIDO2 and ISO/IEC 30107-3 Presentation Attack Detection via iBeta. It can be delivered standalone, as an embedded cloud service, or turnkey as a Credential Service Provider.

Hemen Vimadala

Prior to 1Kosmos, Hemen served as Founder & CEO of Simeio Solutions, Investor at Unicorn Ventures, and Founding Team Member of Vaau (acquired by Sun Microsystems).

[in linkedin.com/in/hemen-vimadala-2561b02](https://www.linkedin.com/in/hemen-vimadala-2561b02)

akaindentity.io

Data and intelligence layer simplifying identity access management (IAM)

Founded in 2023 in San Francisco, AKA Identity is committed to revolutionizing workforce identity programs by leveraging underutilized context that drives decisive action. AKA Identity transforms manual and inefficient identity initiatives into streamlined processes enriched with visibility, intelligence, and actionable solutions.

Sample Customers and Partners

Company Products

AKA Identity is the leader in workforce identity resolution. AKA Identity creates a comprehensive and contextualized view of identities, accounts, and access privileges. This intricate context reveals how these elements interact and impact an organization's security posture.

The AKA Identity platform converts complex data into actionable insights by harnessing advanced analytics and sophisticated algorithms. This empowers organizations to proactively mitigate risks, correct inaccuracies, and make informed decisions that enhance workforce identity programs.

Will Lin

Prior to AKA Identity, Will was a founding team member, Managing Director, and Venture Partner at Forgepoint where he served on 5 IAM Boards. He started his career in investment banking with Citi. He is a published author and co-creator of the Security Tinkerers community.

[in linkedin.com/in/linwilliam](https://www.linkedin.com/in/linwilliam)

Tom Kelly

Prior to Anitian, Tom served as CEO of IDX (ZFOX), AccelOps, Moxie Software, Epicor, BlueStar Solutions, and Blaze Software. He has served on the Boards of Converge, Anitian, Fabrinet (NYSE: FN), FEI Company.

[linkedin.com/in/tom-kelly-396363](https://www.linkedin.com/in/tom-kelly-396363)

Company Products

Anitian’s pre-engineered and automated cloud application infrastructure platforms deploy in a single day to empower enterprises to go from application to cloud to production 80% faster and at 50% of the cost.

- Anitian SecureCloud platforms for Compliance Automation and Enterprise Cloud Security unify DevOps and security to deliver the fastest path to security and compliance in the cloud.
- Drive FedRAMP audit-readiness in 60 days at 50% of the cost.
- Secure applications from cloud to production 80% faster.

anitian.com

Compliance automation and cloud security

Founded in 1995, Anitian delivers the fastest path to security and compliance in the cloud. Its compliance automation platform helps SaaS companies get applications to market quickly and delivers a full suite of security controls – pre-engineered and pre-configured to rigorous security standards such as FedRAMP, PCI, CMMC, GDPR, or ISO27001.

Sample Customers and Partners

Elizabeth Lawler

Elizabeth is a serial entrepreneur. She was CEO and Co-Founder of Conjur (acq. CYBR), Chief Data & Informatics Officer at Generation Health (acq. CVS), and held senior roles in research, data and compliance in healthcare and government.

[linkedin.com/in/elizabethlawler](https://www.linkedin.com/in/elizabethlawler)

Company Products

AppMap leverages diverse and novel data from AppMap Observability and intelligent analysis from the Navie AI architect to assist developers with complex tasks in codebases directly within their code editors. Unlike legacy static code analysis systems, AppMap Observability provides dynamic insights about code behavior and presents interactive, searchable diagrams that let users navigate and visualize exactly how functions, web services, data stores, security, I/O, and dependent services work together.

Navie, the world’s first AI software architect, assists developers with challenging tasks directly within their code editors. Navie delivers intelligent answers and insights into application behavior, APIs, and database interactions. With over 110,000 developers using the platform, Navie assists with planning and implementing code changes across complex codebases.

appmap.io

Cutting edge AI for challenging dev work

Founded in 2019, AppMap is a developer tools platform powered by AI and runtime analysis, composed of Navie (an AI code architect), AppMap Observability data (runtime traces of your application), and AppMap diagrams (interactive visualizations of AppMap data).

Sample Customers and Partners

Over 110K software developers; AppMap libraries have been distributed to codebases in 160 countries, amassing 1M downloads and counting.

bishopfox.com

Continuous offensive security and penetration testing services

Since 2005, Bishop Fox has combined the top minds in offensive security with cutting-edge tools and techniques to help the world's leading organizations proactively address the security of their applications, networks, products and cloud infrastructure.

Sample Customers and Partners

25% of the Fortune 100, half of the Fortune 10, eight of the top 10 global technology companies, and all the top global media companies.

Company Products

Bishop Fox is the leading authority in offensive security, providing solutions ranging from continuous penetration testing, red teaming, and attack surface management to product, cloud, AI/ML and application security assessments. Its Cosmos platform, service innovation, and culture of excellence continue to gather accolades from industry award programs including Fast Company, Inc., SC Media, and others, and their offerings are consistently ranked as "world class" in customer experience surveys.

Bishop Fox has been actively contributing to and supporting the security community for almost two decades and has published more than 16 open-source tools and 50 security advisories in the last five years.

Vincent Liu

Prior to Bishop Fox, Vincent served an Information Security Specialist at Honeywell, a Security Consultant at EY and a Security Analyst at the NSA. He is an Advisor to AppOmni, Elevate Security, Mod n Labs, and CLEAR (clearme.com).

[in linkedin.com/in/vinnieliu](https://www.linkedin.com/in/vinnieliu)

cinchy.com

Delivering on the promise of AI while making integration obsolete with a contextualized, real-time data network

Founded in 2017, Cinchy goes beyond integration by liberating data from across the enterprise to create an evergreen data network for real-time collaboration. Cinchy enables Collaborative Intelligence, accelerates digital transformation, activates insights, and greatly reduces the overhead of ongoing data integration, all in a matter of weeks and with minimal IT support.

Sample Customers and Partners

Company Products

To realize the value within data and make it actionable, understanding the relationship between data points is key. Simple integrations don't capture that context, limiting the potential of your data, teams, and applications.

Cinchy eliminates data silos by liberating information from across your enterprise, enabling real-time, bidirectional data synchronization for a single source of truth. This enables limitless collaboration and data sharing while eliminating version discrepancies. Collaborating enterprise-wide data adds the context that makes data usable and provides greater insight without burdensome admin and training.

Cinchy enables Collaborative Intelligence by teams, apps, and AI across an organization. Users see beyond data overload to better realize ROI, all with a significant reduction in time and budget needed versus standard integration.

Paul Patterson

Prior to Cinchy, Paul served as CRO of Branch, Operating Partner and Resident CRO at Next47, the venture capital group for Siemens, and held senior executive roles at NetApp, DataVisor, Vidado (acq. by SS&C), GLMX, and Adobe.

[in linkedin.com/in/paulpatterson](https://www.linkedin.com/in/paulpatterson)

Kevin Senator

Prior to Constella, Kevin was the CEO of aDolus Technology, CRO of Elevate Security, Special Advisor to the CEO of Forescout, President, CEO, and Board Member of Bayshore Networks (acq. by OPSWAT). He also held senior sales leadership roles at Call Amp, Blackphone, SS8 Networks, Cisco, Redhat and others.

[linkedin.com/in/kevin-senator](https://www.linkedin.com/in/kevin-senator)

Company Products

Constella Intelligence is at the forefront of identity security, offering groundbreaking solutions powered by AI and the world’s largest and most accurate data lake of recaptured dark web identity information.

Constella Intelligence’s advanced capabilities equip leading global organizations with the tools needed for proactive identity monitoring, sophisticated investigations, and comprehensive identity graphing, ensuring robust protection against identity theft and emerging cyber threats.

Identity risk intelligence, powered by AI

Formed in 2020, Constella is a leader in digital risk protection, helping organizations anticipate, identify, and remediate targeted threats to their people, brands, and assets – at scale. Constella combines proprietary data, technology, and human expertise powered by the most extensive breach and social data collection on the planet, from the surface, deep and dark web.

Sample Customers and Partners

Tom Kang

Prior to Converge, Tom served as Head of Cyber, Tech and Media at AGCS, Global Cyber Product Leader at Willis Towers Watson, Enterprise Lead for Cyber, Tech and Professional Liability at The Hartford, and AVP, Director of Claims and Services of the ACE Group.

[linkedin.com/in/thomas-kang-1a142667](https://www.linkedin.com/in/thomas-kang-1a142667)

Company Products

Converge is a modern managing general agent (MGA) that fuses cyber insurance, security and technology to provide businesses with clear and confident cyber protection. By deploying a proprietary data ecosystem underpinned by expert underwriting, Converge provides risk solutions that deliver high-value strategies with improved outcomes.

Converge's philosophy is that insurance needs the right elements and personalized approach to mitigate risk. By partnering with its policyholders, Converge precisely formulates their business needs so they can confidently become cyber secure.

Fusing cyber insurance, security and technology

Founded in 2021, Converge is creating risk management solutions that allow organizations to focus on what matters most – their businesses. The company converges its network of technology service partners, underwriting powered by unique data analytics, and proprietary insurance offerings to provide businesses with more holistic protection.

Sample Customers and Partners

cybcube.com

Quantifying cyber risk for the insurance industry

Founded in 2015 within Symantec, CyberCube now operates as a standalone company exclusively focused on the insurance industry. CyberCube helps insurance companies make better decisions when underwriting cyber risk and managing cyber risk aggregation.

Sample Customers and Partners

Company Products

CyberCube is the leading provider of software-as-a-service cyber risk analytics to quantify cyber risk in financial terms.

Driven by data and informed by insight, the company has harnessed the power of artificial intelligence to supplement its multi-disciplinary team.

Pascal Millaire

Prior to CyberCube, Pascal served as VP & General Manager of Cyber Insurance at Symantec, and President at Fingi. He was also an Engagement Manager focused on property and casualty insurance, reinsurance, insurance brokerage affairs and risk management with McKinsey & Co. Pascal also sits on the Board of Directors of American Funds, managed by Capital Group.

[linkedin.com/in/pascal-millaire-962001b](https://www.linkedin.com/in/pascal-millaire-962001b)

cyberhaven.com

Transforming data protection with data lineage and large-scale graph analytics

Founded in 2016, Cyberhaven has built the industry's first Data Detection and Response (DDR) platform to protect intellectual property and sensitive data from theft and mis-use by mapping the full journey of every piece of data to accurately classify sensitive data, detect risk, and proactively enforce policy.

Sample Customers and Partners

Company Products

Cyberhaven's Data Detection and Response (DDR) platform takes a fundamentally different approach to securing IP and sensitive data from misuse and theft by mapping the full journey of data and using data lineage to accurately classify sensitive data, detect risk, and enforce policies.

The DDR platform is built with Cyberhaven's Dynamic Data Tracing technology, which:

- Traces all data all the time by collecting logs and event data from user endpoints and SaaS applications
- Correlates these events across hosts and all applications to formulate clear and insightful data flows
- Applies large scale graph analytics to detect and respond to risk

Howard Ting

Prior to Cyberhaven, Howard was CMO of Redis Labs, CMO of Zscaler, and CMO of Nutanix. He also held product management and marketing roles at Palo Alto Networks, Cisco, Securent, Microsoft, Identity Engines, and RSA.

[linkedin.com/in/howardting](https://www.linkedin.com/in/howardting)

Kyle Hanslovan

Prior to Huntress, Kyle served as Cyber Warfare Operator at the Air National Guard, Co-Founder & Partner at StrategicIO, and Senior Cyber Vulnerability Analyst at ManTech International Corporation.

[linkedin.com/in/kylehanslovan](https://www.linkedin.com/in/kylehanslovan)

Company Products

Huntress levels the cybersecurity playing field and elevates its community through education and purpose-built technology. Its leading Managed Security Platform is backed by a 24/7 team of elite threat hunters and support to empower the businesses that the big names ignore.

Huntress provides fully managed cybersecurity that protects endpoints, secures identities, monitors logs, and educates employees.

[huntress.com](https://www.huntress.com)

Managed detection and response for SMBs and the IT Providers that serve them

Founded in 2015 by former NSA cyber operators and backed by a team of threat analysts, Huntress enables its partners to uncover what's lurking in their environment and find and stop hidden threats that sneak past preventive security tools.

Sample Customers and Partners

Serves the SMB market through over 120K businesses, with over 3M endpoints and 1M identities protected.

Omar Gabr

Omar co-founded Instabug with Moataz Soliman, Instabug's CTO, shortly after they began developing mobile applications and quickly realized there was no easy way to monitor their application's performance or user experience. Instabug was created to address those gaps.

[linkedin.com/in/okgabr](https://www.linkedin.com/in/okgabr)

Company Products

Instabug is a leading mobile monitoring, crash and bug reporting solution for mobile teams. Founded in Egypt and headquartered in San Francisco, Instabug is the most intuitive mobile-first observability platform that can be utilized throughout the entire mobile app lifecycle, empowering developers to organizations to optimize user experience and overall performance.

The company's platform scales with any sized business, allowing developers and enterprises alike to seamlessly monitor, alert, prioritize and debug during critical phases of the application life cycle. Instabug empowers mobile teams of all sizes with a unified mobile observability platform that provides both overall performance insights and granular information on the issues experienced by their users.

[instabug.com](https://www.instabug.com)

Optimizing mobile application performance

Launched in 2016, Instabug provides best-in-class mobile application performance monitoring (APM), including crash reporting, bug reporting, and a powerful infrastructure that supports over two billion devices.

Sample Customers and Partners

interos.ai

Automated resilience across physical and virtual supply chains

Founded in 2005, Interos is the first and only Business Relationship Intelligence platform designed to protect enterprise ecosystems from financial, operations, governance, geographic and cyber risk in every tier of enterprise supply chains, continuously.

Sample Customers and Partners

Company Products

Interos’s platform enables customers to instantly discover and visualize their supplier ecosystem and identify supplier concentration risk.

The Interos platform conducts multi-facet filtering to enforce sanction controls, expose high risk outliers to proactively monitor black swan events, and offers risk breakouts to understand what drives risk scores for an individual company.

Ted Krantz

Prior to joining Interos, Krantz served as CEO at mobile intelligence platform data.ai, where he helped drive significant recurring revenue growth and the use of AI technology across nearly all the company’s product lines. Ted has held top go-to-market and sales roles at leading organizations including Skai, C3.ai, SAP America and Oracle.

[in linkedin.com/in/tedkrantz/](https://www.linkedin.com/in/tedkrantz/)

loginradius.com

Improving identity security and customer journeys with no-code identity access management

Founded in 2012, LoginRadius offers a no-code/low-code cloud-based-customer Identity and Access Management (IAM) platform. Companies can securely manage customer identities, deliver a unified digital experience across web and mobile applications, and comply with all major privacy regulations such as GDPR and CCPA.

Sample Customers and Partners

Company Products

LoginRadius provides a SaaS customer an Identity and Access Management platform that centralizes customer identities and manages the lifecycle of customer data from registration, login, authorization, and password management. Customers include consumer brands and eCommerce, banking and insurance, health and pharmaceuticals, media, entertainment, and public sector.

Rakesh Soni

Prior to LoginRadius, Rakesh founded NyaConcepts and NyaWebs, and worked as a Project Manager in the energy sector.

[in linkedin.com/in/oyesoni/](https://www.linkedin.com/in/oyesoni/)

Ricardo Villadiego

Prior to Lumu, Ricardo was CEO and Founder of Easy Solutions, which he led to its acquisition by Cyxtera Technologies for \$2.8Bn in 2017. Prior to Cyxtera, he held leadership roles at IBM, Trend Micro, and Unisys, scaling each organization into key markets.

[in linkedin.com/in/rvilladiego](https://www.linkedin.com/in/rvilladiego)

Company Products

Lumu's Continuous Compromise Assessment™ model is made possible by its ability to collect, normalize and analyze a wide range of network metadata, including DNS, Netflows, Proxy, and Firewall Access Logs and Spambox.

The level of visibility that only these data sources provide allows Lumu to understand the behavior of your enterprise network, which leads to conclusive evidence on unique compromise levels.

lumu.io

Illuminating network threats with real-time visibility and compromise detection

Lumu enables organizations of all sizes and verticals to operate cybersecurity proficiency through real time network threat detection and automated response.

Sample Customers and Partners

Dan Dica

Prior to Lynx, Dan Dica held global executive leadership positions at OneSpan, VASCO, and Ubisoft, and was the CEO at WhiteStone. He is an Advisory Board Member to Agnostic Intelligence, which provides AI-based software for Third Party Risk Management.

[in linkedin.com/in/dandica](https://www.linkedin.com/in/dandica)

Company Products

Lynx delivers an unparalleled suite of AI-driven solutions to combat fraud and financial crime worldwide. Its offerings include Lynx Fraud Prevention, Lynx Money Mule Detection, and Lynx AML, each designed to address the complex challenges faced by financial institutions and payment providers.

At the heart of Lynx's solutions is its proprietary 'Daily Adaptive Model,' which learns new behaviors and updates models daily, significantly enhancing risk score accuracy. This innovation has saved financial institutions over \$1.6 billion in fraud losses, safeguarding over 69 billion transactions and more than 300 million consumers annually.

Lynx's performance exceeds industry standards by threefold, maintaining exceptionally low false positive rates.

lynxtech.com

AI against Fraud & Financial Crime

Founded over 25 years ago by AI experts from the Autonomous University in Madrid, Lynx is at the forefront of the fight against fraud and financial crime. Lynx's pioneering use of artificial intelligence and machine learning addresses the industry's most pressing challenges with unmatched accuracy, speed, and scalability. Driven by continuous innovation and deep industry expertise, Lynx leads through advanced technology and a commitment to excellence in financial crime prevention.

Sample Customers

Sample Partners

nowsecure.com

Mobile application security automation

NowSecure provides the industry's only Mobile Application Risk Management (MARM) platform, delivering security, privacy, with risk-based compliance testing, automated remediation and executive-level reporting.

Sample Customers and Partners

Company Products

Mobile apps introduce risks that extend far beyond the app itself—exposing financial and operational resilience, brand reputation, and regulatory compliance. NowSecure safeguards the global mobile app ecosystem, protecting the data of millions of users.

Built on industry standards, the NowSecure MARM platform automates continuous risk discovery and progressive testing while orchestrating remediation to prevent leaks, disruptions, and data breaches. Integrated into DevSecOps pipelines, Security Operations, End User Computing, and Compliance teams, NowSecure ensures comprehensive protection while supporting global regulatory requirements. NowSecure strengthens the security and privacy of mobile apps but also protects the customers and employees who rely on them.

Alan Snyder

Prior to NowSecure, Alan served as SVP of Corporate Development at Good Technology, CEO at BoxTone, Founder at Out-of-Sight Service, and CEO at Idea Integration.

[in linkedin.com/in/alansnyder](https://www.linkedin.com/in/alansnyder)

nudgesecurity.com

SaaS security discovery, monitoring and management

Founded in 2022, Nudge's SaaS security management and identity governance eliminates shadow IT and SaaS sprawl while automating and orchestrating lifecycle management for all applications and identities.

Sample Customers and Partners

Company Products

Nudge Security helps modern organizations manage SaaS security at scale by working with employees, not against them.

Its patented approach to SaaS discovery gives IT and security teams visibility of every SaaS and cloud asset ever created in an organization, and automated workflows to nudge employees toward more secure practices.

Russell Spitler

Prior to Nudge, Russell served as VP of Products and Strategy at AT&T Cybersecurity, one of the world's top five largest MSSPs. He also led products at AlienVault and Fortify Software. He is the Co-founder of the Open Threat Exchange, the world's largest open threat intel community with over 200K participants.

[in linkedin.com/in/russell-spitler](https://www.linkedin.com/in/russell-spitler)

Brooke Motta

Brooke is a seasoned leader and executive with a proven track record in the computer and network security industry. Prior to RAD Security, Brooke was VP of Sales at Sonatype, CRO at Wallarm, CRO at Bugcrowd, and held senior roles at Rapid7 and Morgan Stanley.

[linkedin.com/in/brookemotta](https://www.linkedin.com/in/brookemotta)

Company Products

RAD Security’s behavioral, cloud-native detection and response platform creates behavioral footprints of good behavior across the software supply chain, infrastructure, workloads and identities to detect zero-day attacks and sharpen inputs into shift-left and posture management.

rad.security

Eliminating cloud-native threats with behavioral detection and response

Founded in 2018, and formerly known as KSOC (Kubernetes Security Operations Center), RAD Security is a behavioral cloud native detection and response platform built to remediate software supply chain security risks in real time.

Sample Customers and Partners

Haseeb Budhani

Prior to Rafay, Haseeb served as Vice President of Enterprise Strategy at Akamai, Chief Executive Officer & Co-Founder of Soha Systems (acquired by Akamai), and Chief Product Officer at Infineta Systems.

[linkedin.com/in/budhani](https://www.linkedin.com/in/budhani)

Company Products

With Rafay, enterprise platform teams enable developers and data scientists to access compute and AI resources in record time, complete with essential guardrails for security and governance.

Gartner has recognized Rafay as a Cool Vendor in Container Management and GigaOm named Rafay as a Leader and Outperformer in the GigaOm Radar Report for Managed Kubernetes.

rafay.co

Automating cloud and container management for platform teams

Founded in 2017, Rafay offers a first-of-its-kind platform that platform engineering teams leverage to build internal Platform-as-a-Service (PaaS) capabilities.

rapidfort.com

Software attack surface management

Founded in 2020, RapidFort is a native cloud cybersecurity company that helps companies remediate software vulnerabilities and secure cloud workloads automatically.

Sample Customers and Partners

Company Products

RapidFort offers a comprehensive software vulnerability management platform that automatically eliminates 95% of software vulnerabilities in the development cycle without any code changes.

The platform consists of near-zero CVE images of all popular OSs, frameworks, and third-party applications, SCA Scanner, automatic profiling, hardening, and remediation tools.

Mehran Farimani

Prior to RapidFort, Mehran was Founder and CEO of Percipo, developer of ML, deep learning, computer vision and IoT solutions, and SVP of Engineering for the Fieri Division of digital imagery leader EFI.

[in linkedin.com/in/farimani](https://www.linkedin.com/in/farimani)

reversinglabs.com

Malware analysis, threat hunting, and software supply chain security

Founded in 2009, the ReversingLabs cloud platform is the leading provider of malware analysis, threat hunting and supply chain security for SOC and software development teams.

Sample Customers and Partners

Company Products

ReversingLabs automatically analyzes binaries for sophisticated threats hidden across the network, endpoint and software packages to enrich analysis during event response and instill trust during software release. In only milliseconds, ReversingLabs analyzes complex binaries for the world's most sophisticated threats built to evade security controls.

Its Titanium Platform integrates enterprise-wide supporting more than 4,000 file formats, speeds detection of malicious files through automated static and dynamic analysis, prioritizing the highest risks with actionable context. Services are delivered as cloud-based threat intelligence feeds for the SOC, a malware analysis workbench for threat hunters, and continuous software quality and verification assessments for application developers.

Mario Vuksan

Prior to ReversingLabs, Mario held senior research positions at Bitg, Microsoft, and Groove Networks. He has authored numerous studies and speaks regularly at major security conferences like RSA and Black Hat.

[in linkedin.com/in/mariovuksan](https://www.linkedin.com/in/mariovuksan)

Pieter Danhieux

Prior to Secure Code Warrior, Pieter was a globally recognised cyber security expert working 10+ years for the SANS Institute, BAE Systems, co-founder NVISO and co-founder of the BruCON hacking conference.

Secure Code Warrior is a secure coding platform that sets the standards that keep our digital world safe. Secure Code Warrior provides the world's leading agile learning platform that delivers the most effective secure coding solution for developers to learn, apply, and retain software security principles. More than 600 enterprises trust Secure Code Warrior to implement agile learning security programs and ensure the applications they release are free of vulnerabilities.

securecodewarrior.com

Agile learning platform for secure coding development

Founded in 2015 in Australia, SCW offers a proven secure coding Learning Platform, SCW Trust Score to benchmark developers and Trust Agent, governing source code repositories helping companies reduce software security vulnerabilities by 53% and increase remediation speed by 2x.

Sample Customers and Partners

Scott McCrady

Prior to SolCyber, Scott served as CRO of Ubiq Security, General Manager of SonicWall, and GM at FireEye.

[linkedin.com/in/scottmccrady](https://www.linkedin.com/in/scottmccrady)

Company Products

SolCyber's has simplified managed security by taking away the enormous effort required to manage multiple vendor technologies, including the integration and ongoing support. SolCyber customers receive best-in class protection that is faster, simpler and more cost effective to deploy, all in one priced per user license. It provides all customers with a foundational set of capabilities including:

- Advanced Email
- Managed Detection and Response (MDR)
- Ransomware assessment and training
- User Behavioral Analysis
- Managed SOC Services

Customers can start their journey toward a comprehensive managed security program with SolCyber's reimagined MDR, or at any point in between.

solcyber.com

Delivering next-generation managed security protection

Founded in 2020, and incubated within Forgepoint, SolCyber is the first next-gen Managed Security Service Provider (MSSP) to deliver a curated stack of enterprise-strength security tools and services that are streamlined, accessible and affordable for any organization.

Sample Customers and Partners

sphereco.com

Leader in Identity Hygiene - a turnkey intelligent discovery, remediation, and sustainability platform.

Founded in 2010, SPHERE delivers immediate time-to-value by leveraging automation to discover, remediate, and secure identities. SPHERE is an award-winning, woman-led cybersecurity business focusing on improving security and enhancing compliance.

Sample Customers and Partners

Company Products

SPHERE is the global leader in Identity Hygiene. The company is dedicated to reshaping modern identity programs by embedding this foundational fabric, enabling organizations to quickly reduce risks. Its expertise lies in leveraging automation to deliver immediate time-to-value, providing an identity lens that protects an organization's accounts, data, and infrastructure.

Driven by core values of passion, empathy, and authenticity, SPHERE is continually innovating and helping clients to sleep better knowing their attack surface is drastically reduced, thwarting the plans of bad actors every single day.

Rita Gurevich

Prior to SPHERE, Rita served as Director of Messaging Product Management at StealthBits Technologies, Messaging at Barclays Capital, and Messaging AVP at Lehman Brothers.

strata.io

Distributed identity orchestration for hybrid and multi-cloud environments

Founded in 2019, Strata invented Identity Orchestration to enable no-code distributed identity for hybrid and multi-cloud businesses. Its Mavericks Platform automates complex identity integrations by coordinating disparate identity systems to work together.

Sample Customers and Partners

Company Products

Strata Identity is the leader and creator of Identity Orchestration for multi-cloud and hybrid-cloud environments. Its Mavericks platform provides an identity fabric that enables enterprises to secure and modernize their identity systems, enforcing consistent access policies without the need for refactoring. By integrating modern authentication across all applications, it unifies apps and IDPs into a single control plane, reducing technical debt.

A vendor-agnostic IAM platform, Strata also offers Identity Continuity, ensuring continuous availability by failing over to an alternate on-premises or cloud IDP when the primary IDP goes offline.

Eric Olden

Eric Olden, is the visionary behind the Mavericks Identity Orchestration Platform and the Identity Query Language (IDQL) policy standard. As a co-author of the Security Assertion Markup Language (SAML) standard for SSO federation, Eric is considered a leader of modern identity for his transformational work in the field. Before Strata, Eric founded two successful identity management companies, both of which were acquired by RSA Security.

[in linkedin.com/in/boughtnotsold](https://www.linkedin.com/in/boughtnotsold)

Billy Gouveia

Billy has 20 years of experience in a variety of technology and consulting roles, including as co-founder of a ransomware defense company, COO of a managed services start-up, and in executive roles at Protiviti, Sungard, and Booz Allen. He previously worked in the Intelligence Community and served in the US Army.

[in linkedin.com/in/gouveia](https://www.linkedin.com/in/gouveia)

Company Products

Surefire Cyber’s delivery of digital forensics and incident response capabilities is built on a tech-enabled framework and aligns and connects each incident’s law firm, insurance carrier, broker, and client.

- Pre-Incident: Surefire Cyber prepares clients to manage incidents by assessing their resilience, exercising and improving plans, and strengthening their response.
- Incident Response: Surefire Cyber guides clients through ransomware, BEC, and other cyber incidents, bringing forward all the capabilities needed to manage through a response with confidence.
- Post-Incident: Surefire Cyber helps organizations emerge stronger by fortifying their security posture against future events.

SUREFIRE CYBER

surefirecyber.com

Delivering clarity and confidence from response to resilience

Founded in 2019, Strata invented Identity Orchestration to enable no-code distributed identity for hybrid and multi-cloud businesses. Its Mavericks Platform automates complex identity integrations by coordinating disparate identity systems to work together.

Sample Customers and Partners

Dr. Mohit Tiwari

Dr. Tiwari has been a pioneering force in information flow security for over two decades. Before Symmetry, he was a distinguished cybersecurity professor at the University of Texas at Austin and a postdoctoral scholar at UC Berkeley, specializing in secure remote computation. His DARPA- and NSF-funded work has driven cutting-edge research in collaboration with top organizations like General Dynamics, Lockheed Martin, Intel, ARM, and Google.

[in linkedin.com/in/mohit-tiwari8](https://www.linkedin.com/in/mohit-tiwari8)

Company Products

With total visibility into what data exists, where it lives, who can access it, and how it's being used, Symmetry safeguards organizational data from misuse, insider threats, and cybercriminals, as well as unintended exposure of sensitive IP and personal information through use of Gen AI technologies.

Symmetry works with structured and unstructured data in all major clouds (AWS, GCP, Azure), SaaS storage services (e.g. OneDrive), and on-premise databases and data lakes. It is deployable in the most strictly regulated environments; as a read-only service, it inherits all security and compliance controls (e.g. FedRamp). Therefore, the most innovative and security conscious Fortune 50 financial service providers, manufacturers, pharma companies, and federal agencies rely on Symmetry to protect their crown jewel data.

SYMMETRY

symmetry-systems.com

Addresses modern Data+AI security and privacy challenges at scale from the data out, providing organizations the ability to innovate with confidence

Founded in 2018, Symmetry helps customers classify custom data types, reduce data blast radius and attack surfaces, detect ransomware, enforce least-privilege access, and more. Powered by the best-in-class AI, it provides the tools to minimize data risks, ensure compliance, and respond to threats and policy violations in real time.

Sample Customers and Partners

Synadia

synadia.com
nats.io

Founded in 2017, Synadia simplifies distributed applications and data services architectures across any cloud, region, or device. Synadia's secure connective technologies drive cloud- and edge-native innovation for a large customer base ranging from Global 500 enterprises in Finance, Retail, and Automotive and Industrial Manufacturing to innovative startups in AI, FinTech, Clean Energy and Gaming.

Sample Customers and Partners

Synadia is based on the award-winning [NATS.io](https://nats.io) open-source platform powering thousands of applications globally. Synadia is home to NATS.io creators and maintainers.

Company Products

- Synadia Platform packages NATS.io with enterprise-grade capabilities and services. It is a comprehensive toolkit for building distributed systems across cloud and edge environments, featuring integrated monitoring, enterprise-grade security, and compliance measures. It offers a lightweight, scalable infrastructure solution optimized for AI and IoT applications. Available as a self-hosted and fully-managed solution.
- Synadia Cloud: a SaaS multi-tenant, multi-cloud deployment of the Synadia Platform.

Derek Collison

Derek Collison is a 30-year industry veteran, entrepreneur and pioneer in secure and large-scale distributed systems and cloud computing. Derek designed messaging systems at TIBCO, co-founded the AJAX APIs group and created the largest CDN at Google. Derek invented NATS.io when architecting Cloud Foundry at VMware. Prior to founding Synadia, he started Apcera (acquired by Ericsson).

[in linkedin.com/in/derecollison](https://www.linkedin.com/in/derecollison)

uptycs

uptycs.com

Secure Everything from Dev to Runtime

Uptycs is the leading cloud-native security platform designed for large, hybrid cloud environments. It provides comprehensive protection for workloads, wherever they run, by extending security visibility across the entire software development lifecycle, from development to runtime. Uptycs enables organizations to prioritize and manage risk more effectively than traditional CNAPP solutions by leveraging deeper, actionable data insights.

Sample Customers and Partners

Company Products

Uptycs addresses the limitations of first-generation CNAPPs, which often lack the historical data and context to accurately assess vulnerabilities and threats. Uptycs gives organizations powerful visibility into security incidents, enabling them to track vulnerable packages—whether they are running now or ran weeks ago—and assess the impact of a breach. This historical context allows for quicker, more informed responses. Uptycs unifies cloud security operations, fostering collaboration between development, security, and operations teams. It ensures compliance, accelerates remediation, and optimizes security workflows across cloud workloads, containers, Kubernetes environments, and CI/CD pipelines. All of this is managed through a single console that integrates a unified policy framework and a security data lake.

Ganesh Pai

Prior to Uptycs, Ganesh served as Chief Architect of Carrier Products & Strategy at Akamai, Founder & VP of Systems Architecture at Verivue (acquired by Akamai), and Principal Architect at NetDevices (acquired by Alcatel-Lucent).

[in linkedin.com/in/ganesh-pai](https://www.linkedin.com/in/ganesh-pai)

verituity.com

Powering B2B and B2C verified payouts for banks and enterprises

Founded in 2020, Verituity is an integrated disbursement solution that knows, verifies and understands every payer, payee, payout and account to mitigate payout errors and fraud, enable intelligent payment optionality and routing, and deliver on-time payments to the right payee and account.

Sample Customers and Partners

[BNY Mellon Launches New Payment Platform Via Payee-Choice Disbursements](#)

[Verituity Joins Forces with Mastercard to Accelerate Secure Domestic and Cross-Border Payouts](#)

Company Products

Verituity’s mission is to transform payouts into a new source of value for banks, payers, and payees.

Verituity’s verified digital payments platform enables first-time and on-time digital B2B and B2C payouts. The platform incorporates: a) payout origination anomaly detection, b) relationship, account and identity verification, c) dynamic payment optionality and d) policy-driven control of funds and payment routing.

Ben Turner

Prior to Verituity, Ben served as Chief Data & Strategy Officer of Interos, Co-Founder & CEO of MITA Group, and VP of VeriSign.

[in linkedin.com/in/turnerb](https://www.linkedin.com/in/turnerb)

whistic.com

AI-First Third-Party Risk Management

Founded in 2015, Whistic is an all-in-one, AI-powered platform that accelerates the third-party assessment process—allowing InfoSec and Risk teams to confidently collect, share, and analyze security information for every vendor or customer. Whistic has pioneered modern Third-Party Risk Management (TPRM), taking the time necessary to conduct an assessment from days or weeks to minutes.

Sample Customers and Partners

Company Products

The Whistic platform automates TPRM on both sides of the assessment process so vendors and buyers can conduct and respond to more assessments, faster and without cutting corners on security or trust.

Whistic is the only TPRM solution to integrate AI throughout the assessment process to meaningfully reduce manual work, drive insights, and boost operational efficiency with industry-leading transparency—including confidence scores, answer explanations, direct access to sources, and more.

Whistic helps companies significantly reduce the time and resources spent on third-party risk management, de-risk the vendor ecosystem, and shorten procurement and sales cycles. Its Trust Catalog offers the industry’s most robust network where vendors and their customers can connect and exchange on-demand security and compliance information, eliminating the need for a manual assessment.

Nick Sorensen

Prior to Whistic, Nick was Co-founder and COO of Prosper Healthcare Lending, COO of MyFinanceGuys, and held senior roles building and scaling startups.

Our Commitment to ESG

Driving /ESG initiatives/ across the portfolio

Forgepoint Capital’s mission is to protect the digital future. We believe investing in cybersecurity will protect individual privacy and ensure greater economic prosperity. In addition, responsible corporate behavior with respect to Environmental, Social and Governance (ESG) factors can mitigate risk and positively influence long-term financial performance.

We are keen to partner with organizations focused on ESG and are proud to be one of the founding signatories of [ILPA’s Diversity in Action](#) initiative and an active participant in [ILPA’s ESG Data Convergence Project](#). We are also a signatory of the [United Nations’ Principles for Responsible Investment \(PRI\)](#) group.

Our Responsible Investing Pledges

- **Inclusivity:** Foster a culture of meritocracy, fairness, and transparency.
- **Community:** Encourage all firm and portfolio company professionals to engage in nonprofit giving and socially responsible volunteer activities.
- **Actions Over Words:** Proactively work with portfolio companies on environmental, health, safety, and social initiatives to improve performance and minimize adverse impacts.
- **Governance:** Promote appropriate governance of our portfolio companies, including establishment of a qualified board of directors, engagement of independent auditors, and creation of appropriate channels for stakeholders to report potentially improper activities.
- **Compliance & Ethics:** Proactively comply with national, state and local regulations in the countries in which we invest, support competitive wages and benefits for employees, and provide a safe and healthy workplace for all.
- **Data Privacy & Security:** Protect the privacy of confidential consumer and corporate information through our own operations and those of Forgepoint portfolio companies.
- **Protecting Our Planet:** Ensure and continuously improve the environmental responsibility and energy efficiency of our firm and our portfolio companies.
