DISCERN SECURITY

A LESSON FROM THE PIT WALL

Race teams need perfectly tuned systems

Can you say, for sure, that your EDR, Identity, Network and SASE are functioning well?

Sai Venkataraman | CEO and Co-founder

80 combined years in cybersecurity focused on security controls

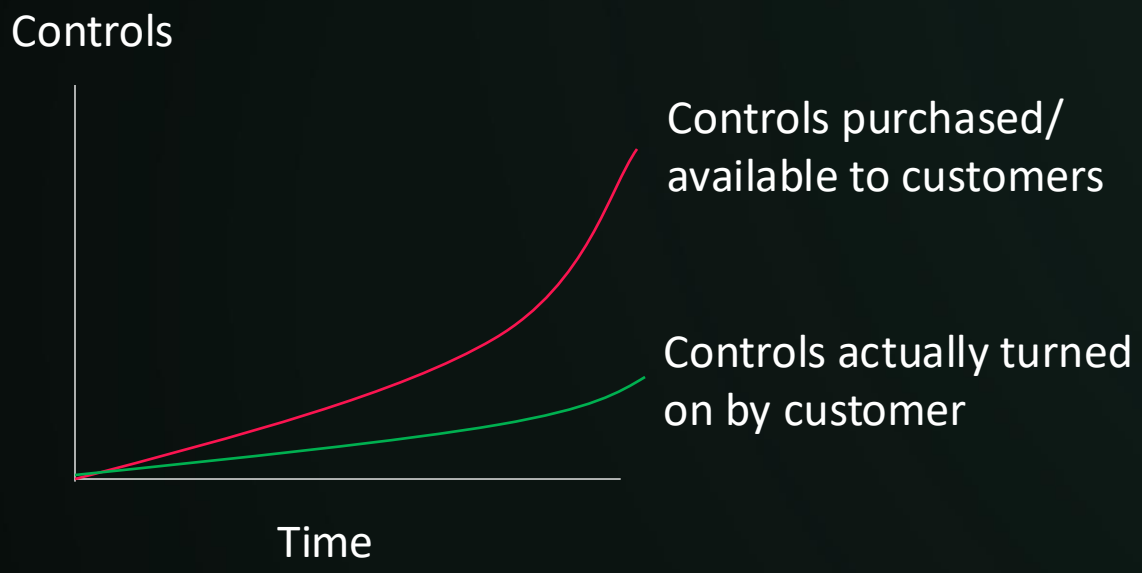

300+ sensors

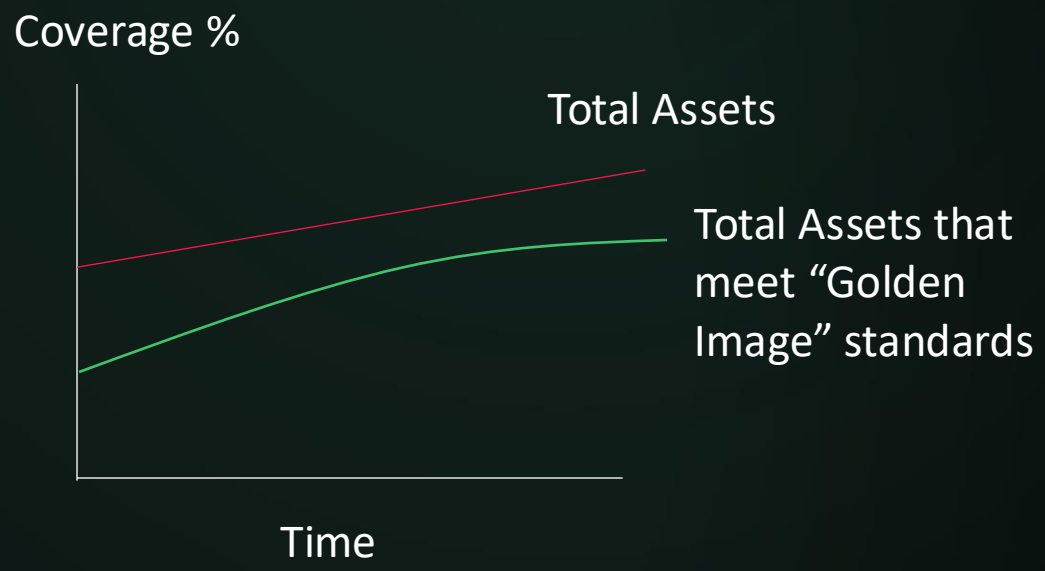

over 1.1 million data points a second, watched live from the pit wall

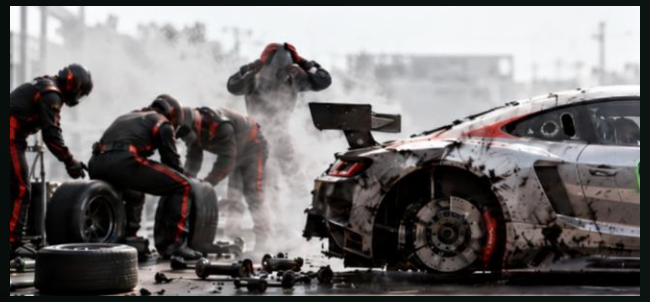

Formula 1 and AWS

ONCE UPON A TIME

>70% of security lies unused

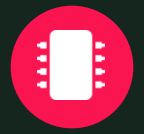

Discern helps customers get race ready

DISCERN SECURITY

UNTIL ONE DAY

At this speed, a small problem becomes a crash.

These gaps aren’t new. What changed is how fast attackers find them.

Thousands

zero-days found by one AI model, on its own, in weeks

Anthropic, Claude Mythos Preview, April 2026

−7 days

average time to exploit: attacks start before the patch exists

Mandiant M-Trends 2026

AI attackers find the broken part in minutes. There’s no warning lap anymore. **You need to see it before it becomes the crash.**

DISCERN SECURITY

BECAUSE OF THAT

Discern has the sensors. Discern is the pit wall.

Your EDR, Identity, SASE etc. already produce the data.
Discern reads it all as one car, and acts on it.

TELEMETRY	Reads your 100+ tools as one car.
RACE ENGINEER	Spots what is drifting, calls the fix.
PIT CREW	AI agents fix it, with your approval.
EVERY LAP	Checks again and proves it to the board.

It doesn’t just show you the problem. **It fixes it.**

Live example: a finance laptop with no EDR, added to the deployment group after approval.

DISCERN SECURITY

UNTIL FINALLY

A straight answer to “Are we actually protected?”

3.5B+
control assessments a month

2M+
assets under assessment

>90%
of POCs become customers

Trusted by enterprises and service partners

Backed by a $13M Series A, July 2026

Carrier · TIAA · SUMITOMO · CAA · HINDUJA · Morgan Advanced Materials · Blue Diamond Growers · TCS Tata Consultancy Services · Coforge · novacoast

100+ security tool integrations
Works with the stack you already own

Named in 4 Gartner Hype Cycles
Automated Security Control Assessment

1 to 2 tools under 10% use
found in almost every assessment

DISCERN SECURITY

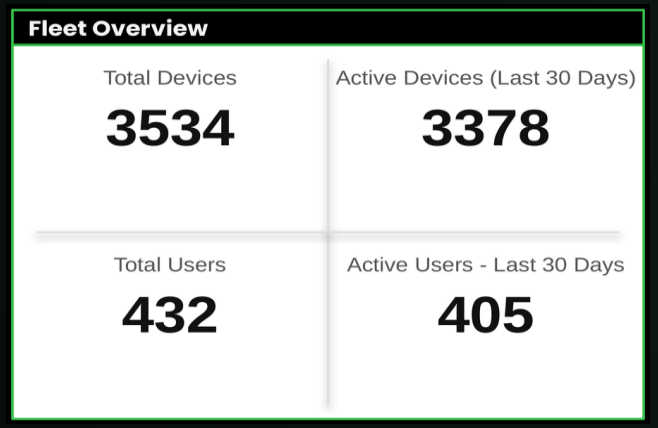

Takeaway

Manage your controls and Posture with Discern Security

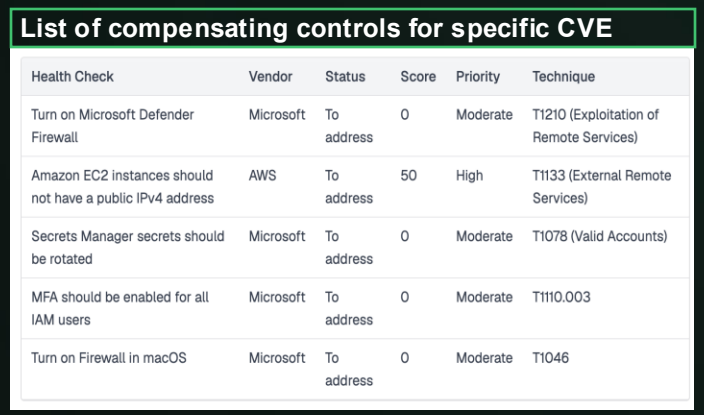

Answers built from a customer's actual environment, not generic security questions.

LIVE CUSTOMER DATA

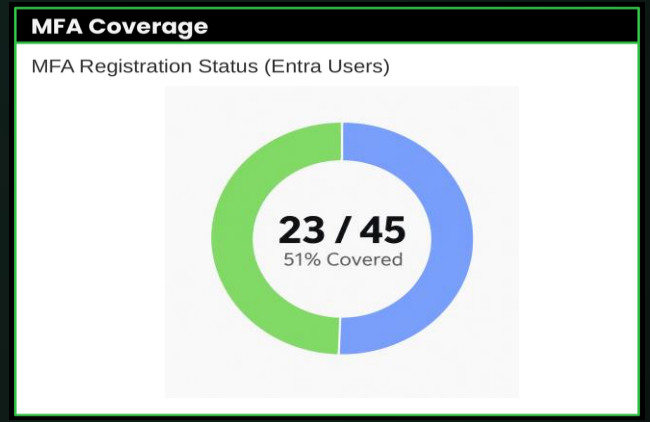

Ask: Show me my asset inventory.

Ask: Show me compensating controls for Mythos

Ask: Deep dive into specific controls

"Agentic AI platform dedicated to security controls management."
